

BUILDING NORTH AMERICA'S NEXT PRIMARY COBALT MINE

NEAR-TERM COBALT PRODUCTION

eCobalt is an advanced stage TSX-listed mining company. The Company's Idaho Cobalt Project ("ICP"), located in East Central Idaho in the historic Idaho Cobalt Belt, is the only environmentally permitted, primary cobalt project in the United States. It is 100% owned by the Company's wholly owned subsidiary, Formation Capital Corporation, U.S.

GROWING GLOBAL DEMAND

Currently, ~125,000 tonnes of cobalt is produced in the world per year. The market for cobalt is projected to grow at a CAGR of 7.7% over the next 5 years, tripling by 2030, primarily due to growing demand for electric vehicles. Countries like Germany, France, Japan and China have vowed to ban Internal Combustion Engines (ICEs) over the course of the next 10 to 20 years, driving the demand for cobalt for use in lithium-ion batteries.

AGGRESSIVELY ADVANCING TOWARDS PRODUCTION

H2 2018

Strengthened Technical Team - new CEO, mine manager, process manager

Improved technical oversight

Increased targeted production rate by 50%

Finalized shortlist of off-take partners

2019

Finalize off-take partner

1,200 tpd Feasibility Study

Secure project financing

Commence development

DISTRICT-SCALE PROJECT POTENTIAL

Substantial land position in the historic Idaho Cobalt Belt

- Historic production from 1940s-1960s
- ~2M tonnes produced at 0.59% (WAVG)

Ram Deposit remains open along strike and at depth

- Extension of historic producing primary cobalt mine
- Ram only 7% of eCobalt's total 5990 acre land holdings

Objective is to grow the deposit and expand the district

- Existing historic resources at Sunshine and East Sunshine
